AICTE nationwide institution database

Research snapshot: 27 October 2026 | Target approval year: 2026-27

INCOMPLETE - NOT A CERTIFIED ALL-INDIA APPROVAL LIST

This release preserves a broad official AICTE institute lookup and a smaller set of dated approval letters. It does not establish that every listed institution is currently approved. The nationwide completion condition was not met because the annual dashboard could not be retrieved and no current official unique-institution denominator was reconciled.

What was actually established

Measure	Result
Institution-level records delivered	9,009
PIDs directly recorded in examined AICTE sources	9,002
Records backed by a published 2026-27 AICTE letter	40
Requested IC / Institute Code values verified	0
Records missing PID	7
States and union territories examined	36; records retrieved for 35
Unresolved state records	6
Course / intake rows extracted from current letters	352

The key source discrepancy

The placement portal reports 9,066 entries. Its complete bulk response and ten paginated responses return the same 9,003 rows. The difference of 63 is unresolved. These are counts from an undated lookup, not a current approval denominator. No cause for the discrepancy is asserted.

Six repeated-PID rows were consolidated, leaving 8,997 registry-based institution records (8,990 non-empty PIDs plus seven separate records with no PID). Twelve additional PIDs came from dated approval letters, producing 9,009 records and 9,002 non-empty PIDs. Different PIDs were not merged based on similar institution names.

Identifier definitions and boundaries

Identifier	Verified interpretation and handling
PID	AICTE Institute Permanent ID. The AICTE SSPCA manual explicitly expands PID this way. It appears separately from Application ID in approval letters.
IC ID / Institute Code	No examined authoritative source establishes a single nationwide AICTE approval identifier with this exact label. Every requested IC ID remains Not publicly verified. This is a definition/evidence gap, not proof that no institution code exists in any system.
IIC / MIC IC ID	A distinct innovation-council namespace. NWIMSR explicitly associates IC202115977 with its Institution Innovation Council. It is not used as an AICTE approval Institute Code here.
AICTE Application ID	Application-specific field preserved separately from PID. A new-institution LoA can show the same value in both fields; this does not make the fields interchangeable.
AISHE Code	A separate higher-education survey identifier. No AISHE code is substituted for PID or IC ID.
University / counselling code	Local affiliation or admission identifier; issuer and namespace differ. No automatic crosswalk to an AICTE identifier is made.

Do identifiers remain unchanged?

PID is the intended longitudinal institution identifier and is used as the exact join key. This research does not establish an unconditional rule that it can never change after merger, reconstitution or a new approval unit. Approval year, application and status are stored separately. No cross-year guarantee was verified for the undefined IC namespace or for IIC registration IDs.

State and UT coverage

Counts below describe this export. The official 2026-27 institution count and the number still missing are Not publicly verified for every state/UT. Coverage is therefore not reconciled. A zero is a retrieved-record count, not proof of absence.

State / UT	Export records	Verified PIDs	2026-27 letters
Andaman and Nicobar Islands	2	2	0
Andhra Pradesh	786	786	1
Arunachal Pradesh	10	10	0
Assam	73	73	0
Bihar	166	166	3
Chandigarh	18	18	1
Chhattisgarh	125	125	0
Dadra and Nagar Haveli and Daman and Diu	6	6	0
Delhi	2	2	2
Goa	19	19	0
Gujarat	319	319	1
Haryana	434	434	2
Himachal Pradesh	77	77	1
Jammu and Kashmir	61	61	1
Jharkhand	98	98	1
Karnataka	635	635	1
Kerala	392	392	2
Ladakh	0	0	0

State and UT coverage, continued

State / UT	Export records	Verified PIDs	2026-27 letters
Lakshadweep	1	1	0
Madhya Pradesh	481	479	1
Maharashtra	1099	1097	5
Manipur	4	4	0
Meghalaya	7	7	0
Mizoram	5	5	0
Nagaland	13	13	0
Odisha	363	363	5
Puducherry	31	31	1
Punjab	331	331	0
Rajasthan	312	312	2
Sikkim	5	5	0
Tamil Nadu	1223	1222	0
Telangana	407	407	4
Tripura	13	13	1
Uttar Pradesh	1028	1026	3
Uttarakhand	212	212	2
West Bengal	245	245	0

Unresolved state: 6 additional records. Source state values were absent or malformed. No location was guessed. Older Dadra and Nagar Haveli / Daman and Diu labels were consolidated under the present merged UT, while raw source labels were retained.

Method, verification and limitations

Collection and reconciliation

1. Established identifier semantics from AICTE material before mapping fields.
2. Attempted the national AICTE homepage, approved-institution dashboard and published dashboard data endpoint. The homepage showed maintenance; dashboard requests timed out or failed.
3. Retrieved the public placement institute lookup via the request used by its registration page. Saved the complete response and independently fetched all ten pages. Both produced the same 9,003 source rows.
4. Searched state-by-state across all 36 states/UTs for official government, technical-education and institutional approval material. Unrelated NCTE, RCI, AISHE and COA records and commercial directories were not imported as AICTE approvals.
5. Attempted 49 published approval PDFs/URLs. Forty were machine-readable current approval letters after retries. Nine were inaccessible, unavailable or unreadable.
6. Joined only exact PIDs, retained raw name variants, normalized state labels conservatively and extracted course tables. Exported text identifiers without changing hyphens or leading zeros.

Verification classes

All 9,002 non-empty PIDs are directly labelled in an official AICTE lookup or an AICTE-generated approval letter. This verifies the identifier as recorded, not current institutional status. Overall row status is Partially verified when the requested IC ID is missing. Seven records without a PID are Unverified. Cross-verified is not assigned: an independent official PID crosswalk was not established. Two publications derived from the same authority are not presented as independent confirmation.

Material limits

The annual approved-institution database is unavailable in this research environment. Most records have no verified current approval year, course list, institution type, affiliation, district/city, PIN or website. Website hosting domains are not automatically substituted for confirmed institution homepage URLs. Some registry names are abbreviated or old. District and city extracted from letters retain the letter spelling and may use historical boundaries. Approval status means approval stated in the published 2026-27 letter; later corrigenda, withdrawal orders, closure and admission restrictions were not exhaustively checked.

One record has a nonstandard numeric PID format in the source; its value is preserved and flagged. Similar names with different PIDs remain separate approval units. NIST has an explicit approved name change in its letter; other name differences are recorded without asserting a legal rename. No closed institution is classified solely because it is missing from a search result.

Historical pharmacy or architecture entries do not establish current AICTE regulatory coverage. Current PCI/COA-only lists were not merged into the AICTE-approved population. The handbook includes additional programme categories, including BBA/BCA; programme-specific totals cannot be summed to obtain unique institutions.

Files and completion requirements

Delivered files

AICTE_All_India_Colleges.xlsx: master records, all 36 state/UT worksheets, unresolved-state records, coverage reconciliation, course/intake details, duplicate review, name variations and the approval-source log.
AICTE_Missing_IDs.xlsx: all 9,009 records are included because the requested IC ID could not be verified; a separate worksheet isolates the seven missing PIDs.
AICTE_Research_Report.pdf: this report.
AICTE_Research_Evidence.zip: CSV exports, source snapshots, fetch/parse logs, state-specific discovery results, full source URLs and a text version of the report.

What would make the database complete

Obtain an authoritative machine-readable AICTE approved-institution export for 2026-27, including all programme levels and modes, and a unique-institution count per state/UT. Confirm what the requested IC namespace means and who issues it. Reconcile every exported institution against the annual approval file; collect and verify remaining fields and current EOA/LoA/corrigenda. Resolve the 63-row source discrepancy, the six unresolved states, missing PIDs, repeated-PID variants, potential multiple-PID entities and all inaccessible approval documents. Check current closure, withdrawal and no-admission orders. Only then calculate coverage percentages or claim nationwide completion.

Validation performed

Bulk/paginated record sets compared exactly; 9,003 rows in each. Non-empty PID uniqueness checked after consolidation. State subtotals plus unresolved-state records checked against the 9,009 master records. PID and application columns exported as text. Every populated current approval record has a dated AICTE letter URL. Missing values remain explicit. No institution identifiers were invented. Workbooks were inspected and their presentation reviewed; the source logs remain available for audit.

Published approval source register

These are AICTE-generated records on institutional or government websites. A successfully parsed letter confirms what the published document states; it is not a live check for later orders. Full source and fetch details are also in the workbook and evidence archive.
